PROFILE

RFG is a leading producer of fresh, frozen and long life convenience meal solutions for customers and consumers across South Africa, sub-Saharan Africa and major global markets. RFG's balanced portfolio of market leading brands, which includes Rhodes, Bull Brand, Magpie, Squish, Hinds and Today, is complemented by private label product ranges packed for all major South African retailers and international customers.

TRADING AND FINANCIAL PERFORMANCE

Group revenue increased by 3.5% to R4.0 billion. The regional segment reported a strong recovery in volumes despite consumer spending remaining under pressure in the domestic market and accounted for 87% of the Group's revenue.

| Revenue (% change) | Increase/(decrease) | Volume | Price | Mix | Forex |
|-----------------------|---------------------|--------|-------|-------|-------|
| Regional segment | 7.6 | 9.9 | (0.6) | (1.7) | |
| International segment | (17.2) | (11.7) | (3.3) | 0.4 | (2.6) |
| Total Group | 3.5 | 6.3 | (1.4) | (1.0) | (0.4) |

Regional revenue increased by 7.6%, driven by volume growth of 9.9% (H1 2024: volume decline of 5.5%) and price deflation of 0.6% (H1 2024: price inflation of 10.0%).

Within the regional segment, long life foods increased revenue by 7.2% with volume growth of 14.5%, which was partially offset by price deflation of 3.7%. The fruit juice, dry foods and pulps and purees categories all delivered double digit revenue growth. Volume gains were supported by a heightened focus on product and packaging innovation, most notably the launch of the fruit nectar juice range.

Long life foods performance was negatively impacted by pressure on canned meat volumes due to high input costs, consumer resistance to price increases and high levels of promotional activity in the canned protein meals category.

Fresh foods revenue grew by 8.3%, supported by volume growth of 1.5% and price inflation of 5.0%. The ready meals and pie categories both reported good revenue and volume growth.

RFG continued to record market and brand share gains in several key product categories. The Group's brands are the market leaders in canned meat (Bull Brand), canned tomato (Rhodes) and frozen pies and pastry (Today). The Rhodes brand holds the number two positions in fruit juice, canned fruit, jam, canned vegetables and infant meals, with Hinds the number two brand in spices, herbs and peppers.

Revenue in the international segment declined by 17.2%, impacted by softer global demand and shifting market dynamics. Several canned deciduous fruit contracts were not honoured by customers in the Far East, resulting in product being redirected to alternative markets where it was sold at lower prices. The delay in securing new customers further contributed to an 11.7% decline in export volumes. This was compounded by a shortage of canned pineapple stock due to the drought conditions in Eswatini that adversely affected fruit quality and yields.

The Group's gross profit of R999 million was in line with the prior period while the gross profit margin declined by 80 basis points ("bps") to 24.8% due mainly to selling price deflation, particularly in the international segment.

The regional operating profit increased by 4.9% to R343 million while the operating profit margin reduced slightly to 9.8% from 10.0%. However, the international operating profit was R72.5 million lower at R0.7 million, with the operating profit margin reducing from 11.5% to 0.1% due to the lower revenue and pressure on the gross profit margin owing to selling price deflation. This contributed to the Group's operating profit declining by 13.9% to R343 million, with the operating profit margin 170 bps lower at 8.5%.

Earnings before interest, tax, depreciation and amortisation ("EBITDA") were 8.8% lower at R503 million and the EBITDA margin contracted by 170 bps to 12.5%.

The Group's net interest cost was R13 million lower at R26 million due to the Group's lower debt levels and lower average interest rates over the period.

Headline earnings at R231 million were 11.9% lower than the prior period with headline earnings per share (HEPS) declining by 11.9% to 88.7 cents. Earnings per share reduced by 11.3% to 89.1 cents and diluted HEPS by 12.3% to 87.5 cents.

Net working capital totalled R2.2 billion at the end of the period, R52 million lower than the prior corresponding period. Inventory levels reduced by R25 million while the R153 million increase in accounts receivable was more than offset by a R180 million increase in accounts payable. This limited the group's investment in net working capital to R164 million for the interim reporting period (H1 2024: R433 million). The R269 million lower investment in net working capital contributed to cash generated from operations increasing by R248 million to R343 million for the reporting period.

Net debt decreased by 29.8% or R349 million to R821 million and the net debt-to-equity ratio improved to 22.0% from 33.3%. Long-term loans of R106 million were repaid while no loans were raised during the half year ended 30 March 2025. Capital expenditure amounted to R168 million (H1 2024: R200 million) and is expected to total R430 million for the full financial year.

Owing to the weaker performance of the international segment, the Group did not achieve its medium-term targets.

INTERIM DIVIDEND

Following the increase in the Group's dividend payout ratio from 33.3% to 50.0% of headline earnings for the 2024 financial year, the board has amended the dividend policy and will now declare both an interim and a final dividend each year. Accordingly, an interim dividend of 29.6 cents per share has been declared, based on a dividend cover ratio of 3.0 times HEPS.

USA TRADE TARIFFS

The significant increase expected in trade tariffs on exports to the United States of America ("USA") presents a potential risk to the revenue and profitability of the international business. While the tariff rate and the commercial impact thereof remain uncertain, RFG is actively engaging with its USA customer base to determine contract terms post the implementation of new tariffs. If the tariffs result in RFG's products no longer being price competitive, excess inventory may need to be redirected to existing markets or new opportunities identified. Sales to the USA accounted for approximately 24% of the Group's international revenue for the first six months of the financial year. This represents a significant increase from 16% in the prior period due to the changing market dynamics referred to above.

OUTLOOK

Rising global tensions and escalating geopolitical risks driven by developments in the USA have heightened uncertainty across international markets. This ongoing instability has also negatively impacted South Africa's macroeconomic outlook and slowed the country's economic recovery.

Management is confident that the trading momentum in the regional segment will continue into the second half of the financial year, despite ongoing pressure on consumer spending and weakening confidence amid the local and global uncertainty. Product and packaging innovation will be key to driving brand share growth and expanding into new product categories.

The business remains focused on the effective management of sales volumes, the gross profit margin and other operating costs to achieve the regional operating profit margin target of 10%.

In the international segment, an oversupply of deciduous fruit products driven by softer global demand is creating downward pressure on volumes and prices. However, shipments of RFG's deciduous fruit products are gaining momentum after the first-half delays, which is expected to support higher international revenue in the second half of the year. While the climatic conditions impacting pineapple production in Eswatini are improving, the recovery is expected to take longer than initially anticipated and will likely impact the performance of the international segment for the remainder of the financial year.

Any reference to future performance included in this announcement has not been reviewed or reported on by the Group's independent auditor.
